

Please listen to the examples below. I only used four different articulations. It is the combining of them (of articulations in general) which makes the music more interesting. I tried to simulate a possible "bowing - scenario" for the violin. This concept always enhances the natural manifestation of string instruments. Even if we have no legato samples - sometimes it seems to be that we have those...

Articulation - Examples for some music phrases

© Createc Beat Kaufmann, Oct. 2007

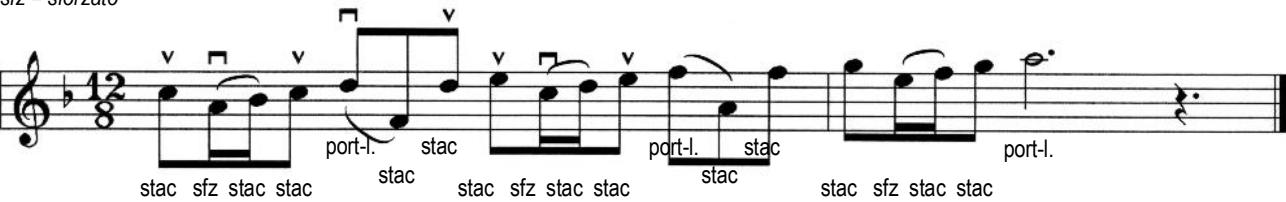

(Listen to the corresponding mp3-file as well)

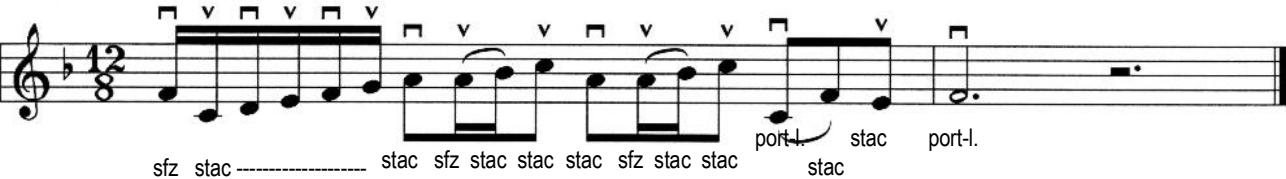

port-l. = portato long (~0,5s)

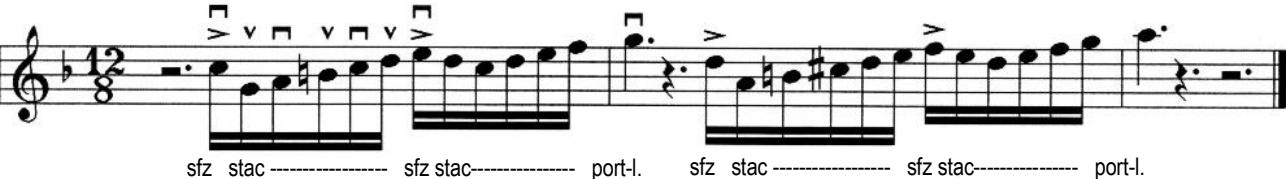

port-s. = portato short ~0,3s)

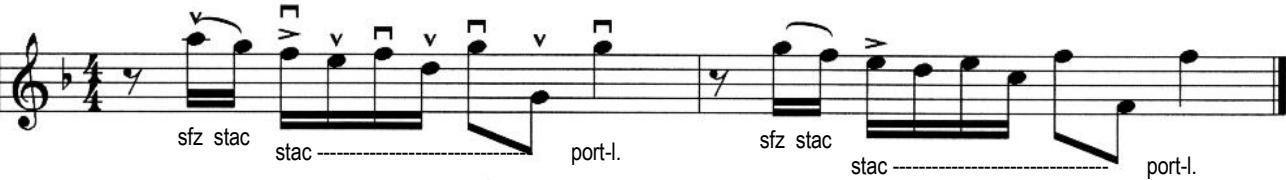

stac = staccato

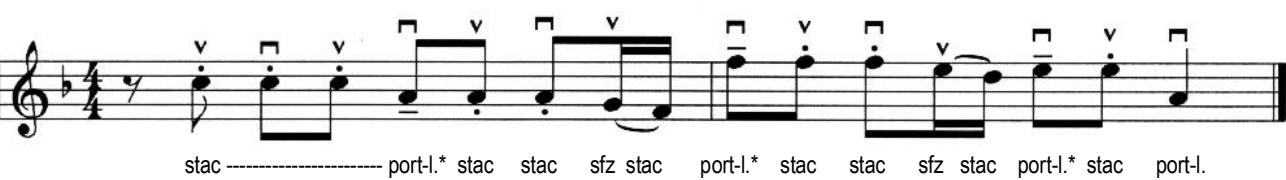

sfz = sforzato

1. 

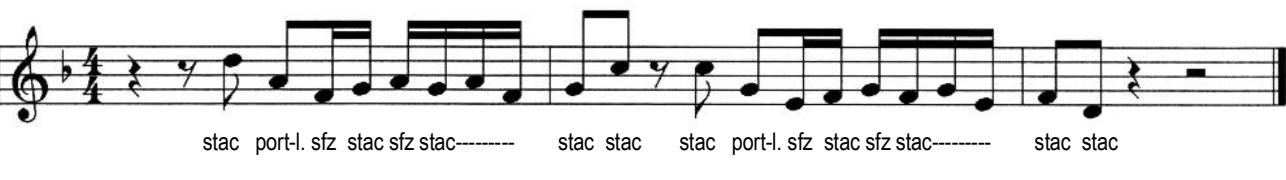

2. 

3. 

4. 

5. 

* portato isn't played as long it is. so it is cut by a too short midi - note.

6. 

7.
